about us

Maku Holdings is a 100% Black youth Owned South African-based entity. We specialise in constructing overhead power lines. We are experienced in supplying line hardware material. Some of the materials we supply include coal, manganese, and copper cathode. Other services we provide are topsoil stripping, crushing, line designing as well as other mining-related services.

We believe in a dynamic and innovative approach to business, a decision deliberately taken to provide unique service delivery to Maku Holdings' clients and stakeholders. We are a proudly South African company that supports the government's initiative of growing local content.

our objectives

To provide services within our area of expertise to the highest professional levels, and greatness in conveying work to our clients and partners.

vision and mission

Maku Holdings envisages the establishment of a sustainable and reliable overhead power line construction entity. It's a company whose vision is entrenched in a consistent supply of related line hardware, and natural resources as well as mining and trading minerals. The aim of the company is to diversify into a formidable services company.

our values

We operate under a strong set of values that extol innovation, integrity, teamwork, excellence and service delivery. Through our values, we strive to achieve workable, sustainable solutions that benefit our clients and stakeholders.
